

Turbo Floor Coat

Floors That Resist. Colors That Persist.

Floors are the most tested surfaces in any space – exposed daily to footsteps, wheels, weather, and time. Turbo Floor Coat is crafted to answer that challenge with Surface Super-Bond Technology, ensuring stronger grip, longer wear, and a refined finish. Unlike ordinary coatings, Turbo Floor Coat is engineered for heavy-duty use – from driveways and parking areas to walkways, terraces, and courtyards. Its abrasion-resistant shield withstands both human and vehicular traffic, while its washable, water-repellent film makes upkeep simple. Added protection against algae and fungus keeps surfaces looking fresh even in monsoon-prone regions.

Key Features & Benefits

Surface Super-Bond Technology

Advanced adhesion for longer-lasting protection.

Traffic-Ready Durability

Resists wear from footsteps and vehicles.

Abrasion Resistance

Protects against wear from footfall and vehicle movement.

Washable & Easy Maintenance

Simplifies cleaning and care.

Water Repellency

Guards against seepage and surface weakening.

Algae & Fungus Resistance

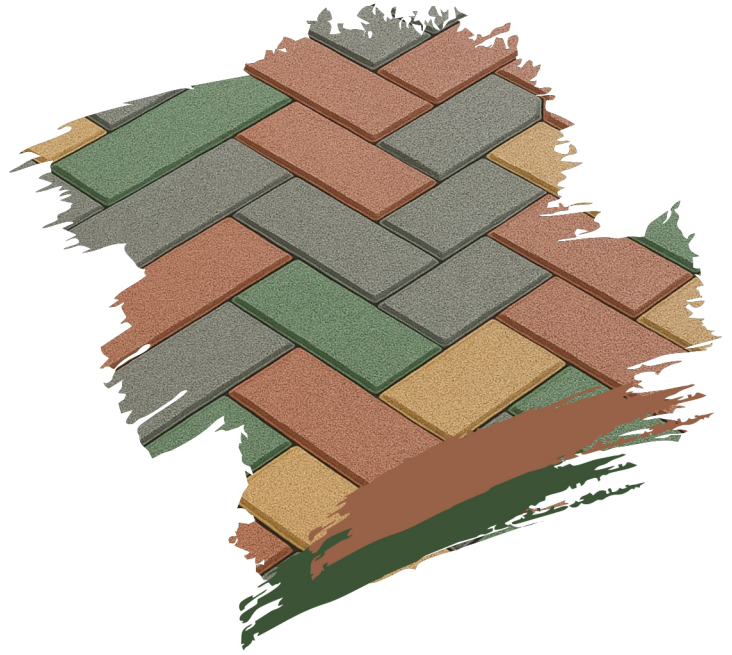

Keeps floors hygienic and neat.

UV Stable Colours

Protects surfaces from fading under the sun.

Washable & Stain Resistant

Keeps floors looking clean and fresh.

Applications

- | Driveways & parking zones
- | Terrace floors & open cemented areas
- | Interlock tiles & garden pathways
- | High-traffic residential or commercial floors
