

Turbo Crack Filling Paste

Seal. Strengthen. Simplify.

Cracks don't just spoil appearances – they weaken surfaces and invite moisture, dirt, and long-term damage. Turbo Crack Seal goes beyond simple filling. Its fiber-lock matrix grips the plaster on both sides of a crack, creating a reinforced seal that restores strength and smoothness. The moisture-guard film resists water entry, while its flex-adaptive structure allows the repair to move naturally with the wall, reducing the risk of reopening. With brilliant whiteness, strong adhesion, and high mechanical stability, Turbo Crack Filling Paste blends seamlessly under paints and ensures repairs remain durable, neat, and reliable.

Key Features & Benefits

Fiber-Lock Matrix

Anchors into plaster for a reinforced repair.

Moisture Guard

Blocks dampness and seepage.

Flex-Adaptive Structure

Moves with walls to prevent re-cracking.

Superior Whiteness

Provides a clean base for topcoats.

Mechanical Stability

Adds strength around repaired areas.

Smooth Application

Ready-to-use, easy to spread paste.

Turbo Wall Putty

The Perfect Base for Perfect Walls.

Turbo Wall Putty is a high-quality, white cement-based putty designed to create a smooth, durable, and paint-ready surface for both interiors and exteriors. Its moisture-resistant composition forms a strong bond with concrete and plastered walls, reducing flaking and ensuring paint lasts longer.

Formulated with next-gen binding polymers, Turbo Wall Putty delivers excellent adhesion, coverage, and crack resistance while its bright whiteness and refined finish enhance the appearance of topcoats. By sealing minor surface imperfections, it ensures that paints achieve their true shade, richness, and elegance.

Key Features & Benefits

Brilliant Whiteness

Acts as a bright canvas for paints, enhancing colour vibrancy.

Strong Surface Grip

Creates a tough bond with cement plaster and concrete.

Moisture Resistance

Protects walls from dampness, reducing flaking and peeling.

High Coverage & Smoothness

Spreads evenly for a fine, polished base.

Crack & Peel Resistance

Flexible structure that reduces minor cracks.

Topcoat Enhancer

Ensures better adhesion and finish for emulsions, enamels, and distempers.
