

Turbo Powder Coatings

Turbo Powder Coatings deliver the perfect balance of strength and aesthetics. Designed for industries that demand long-lasting durability, flawless finishes, and sustainable solutions, Turbo creates a tough, protective film that resists scratches, impact, chemicals, and weathering - keeping surfaces resilient and vibrant for years.

With a zero-VOC, eco-friendly formulation and superior transfer efficiency, Turbo is as sustainable as it is efficient. Available in a wide range of finishes – Matt, Semi-Glossy, Glossy, Alligator, and Structure - it offers design freedom without compromising performance.

Trusted across automotive, furniture, appliances, architectural, and industrial applications, Turbo Powder Coatings ensure every project stands out with enduring quality and professional brilliance.

Structure Finish

Key Features & Benefits

Ultra-Durable Film

Excellent resistance to scratches, abrasion, and mechanical impact.

Chemical & Corrosion Resistance

Withstands oils, solvents, mild chemicals, and protects metal substrates.

UV & Weather Stability

Retains gloss, shade, and performance in outdoor exposure.

Versatile Finish Range

Available in Matt, Semi-Glossy, Glossy, Alligator, and Structure finishes for aesthetic flexibility.

High Coverage Efficiency

Optimized transfer efficiency and uniform film build, saving material costs.

Superior Adhesion

Strong bonding to MS, Aluminium, and other fabricated substrates.

Eco-Friendly Technology

Zero VOC, 100% solid formulation, recyclable overspray for sustainable finishing.

Colour & Gloss Retention

Long-lasting brilliance, shade accuracy, and consistency across batches.

Industrial-Grade Reliability

Designed to meet the needs of automotive, appliances, furniture, architectural, and general industry applications.
